Introduction

Technical Writing is used to communicate technical information clearly and effectively.

- Reports
- Research papers
- Presentations
- Technical documentation

LaTeX

LaTeX is a document preparation system.

Features:

- Professional formatting
- Mathematical equations
- Tables and figures
- Automatic numbering

Beamer

Beamer is used to create presentations using LaTeX.

- Creates professional slides
- Supports different themes
- Includes equations and tables

Doxygen

Doxygen is a documentation generation tool.

- Generates software documentation
- Uses special comments in source code
- Supports C++ and other languages

Git and GitHub

Git:

- Tracks changes in files
- Manages project versions

GitHub:

- Hosts Git repositories
- Supports collaboration

Conclusion

Technical Writing tools help us create professional documents and presentations.

Thank You!
